I have received an exe that is like these type of exe what do you think is it a spy ware and if so please how can i remove it from my computer? Thanks in advance A: If this is 32-bit executable, you may use executable packer such as Dotfuscator, which can either pack it or replace the original. The executable is not only spyware, but also a virus or malware if it installs some programs on your computer. This exe does not have any particular signature, so it's hard to tell what it is. Politicians, political candidates and at least one of the Democratic Party's biggest-name super PACs will be able to receive unlimited donations in the months leading up to the 2018 midterm elections, a court ruling declared Monday. The unanimous ruling by the United States Court of Appeals for the District of Columbia Circuit overturns a law passed by Congress in the wake of the Citizens United Supreme Court decision in 2010 that prevented political donors from giving an unlimited amount of money to campaigns, parties and political action committees. The decision allows political action committees to keep giving to campaigns, parties and super PACs until 2018 as long as they do not use the money for explicitly election-related communications. It is not immediately clear when that will be the case. The decision by a conservative-leaning court to limit political speech has provoked sharp criticism from Democrats who have said the court has rendered the democracy that is supposed to make laws from the people. Republican Party leaders see the ruling as an opportunity to counter Democrats in 2018, as they have attempted to establish themselves as the party of the people in opposition to a Republican Party leadership dominated by wealthy donors. "In an era in which our democracy has never been under greater threat, it is more important than ever for us to have a government that works for all Americans, not just the wealthy and well-connected," Republican National Committee Chairman Ronna McDaniel said in a statement.
